CCSVI Screenings

We are offering screening diagnostic ultrasounds to evaluate Multiple Sclerosis patients for Chronic Cerebro-Spinal Venous Insufficiency (CCSVI) at Georgetown University Hospital.

- We are not currently involved in a clinical trial and apologize in advance for any confusion.
- This is a screening ultrasound only which may or may not lead to therapeutic treatment in the future.
- This screening may or may not be covered by insurance.
- We must receive a faxed order for an **Extracranial Cerebrovascular Venous Ultrasound** signed by the patient's neurologist.
- The signed order from the neurologist must include **Diagnosis and ICD9 Code**.
- Fax the order to **202-444-7114** or send to **Georgetown University Hospital, Division of Vascular Surgery, 4PHC, 3800 Reservoir Rd., NW, Washington, DC 20007**.
- The patient's referring neurologist will receive a copy of the ultrasound.
- The patient must contact his/her neurologist to review or obtain a copy of the report.
- **See attached order that can be printed for the referring provider to complete.**
- If you need further assistance please call **202-342-2400**.
