02.11.2010

AMEDS Centrum has reached a preliminary agreement with Dr Paolo Zamboni with regards to cooperation and mutual support in the area of CCSVI research and implementation of its results in CCSVI diagnosis and treatment.

As a part of the program:

- members of AMEDS Centrum medical staff are scheduled to visit Dr Zamboni in the beginning of December and receive a full training in the area of CCSVI diagnosis, covering the latest version of the diagnostic protocol;
- AMEDS Centrum is to participate in Dr Zamboni research program as one of select medical centers which are going to implement CCSVI specific research protocol;
- AMEDS Centrum is to support Dr Zamboni in his CCSVI research program with diagnostic data and observation already collected since its inception.

The main goals of the research program are: an establishment of the second CCSVI diagnostic protocol and provision of scientific data assessing the effect of CCSVI treatment on the dynamics of the neurological changes in patients.

29.10.2010

We have the pleasure to announce that we are now in position to DOUBLE the number of patients served daily. We have been mentioning this plan to our patients for some time and now it has become a reality.

As a result, we are expecting to reduce treatment waiting list to no more than THIRTY days - as promised to our patients since the beginning of our activities in the area of CCSVI diagnosis and treatment.

Along with the availability of additional equipment and hospital beds, we have increased number of coordinators to secure prompt response to treatment inquiries and have received a green light from our medical team leader - Dr Maciej Zarebinski regarding his team readiness to serve additional number of patients.

25.10.2010

AMEDS has been aware of the issue related to the letters sent to the Ministry of Health with regards to CCSVI treatment in Poland for some time now. We are looking at possibilities to provide relevant information to the Ministry of Health aimed at securing access to unbiased information regarding the results of international research, opinions of patients, and opinions of doctors that may be important to the Minister of Health in the process of discussions that may take place in the future.

At present we do not see any reasons for concern for patients as we are scheduling appointments between now and the end of January with an average waiting time of 30 days.

Also, we have a pleasure to announce that AMEDS Centrum since its inception has treated nearly 300 patients.

17.09.2010

AMEDS Centrum is introducing „MyLabVinco”; Premium Echo Doppler Ultrasound System. The only product designed specifically for the diagnosis of CCSVI available on the market.

CCSVI is a medical condition where deoxygenated blood flow from the veins surrounding the brain and spine is slowed or blocked in its return to the heart. This condition arises mainly from blockage in the internal jugular and/or azygos veins.

CCSVI, Chronic Cerebrospinal Venous Insufficiency, has been recognized recently, thanks to Italian scientist Dr. Zamboni in majority of MS patients.

TECHNICAL SPECIFICATIONS:

- Premium Echo Doppler Ultrasound System
- QDP Exclusive 3D Doppler Technology for multiple directional flow
- High sensitivity for Venous Low Flows

- CCSVI and VHISS (Venous Hemodynamic Insufficiency Severity Score) analysis, protocol and scoring system
- Dedicated measurements and reports

16.07.2010

Recently we have had a visit of Dr Franz Schelling (Austria) sharing his in-depth knowledge of vein physiology and correcting veins through surgery in the context of CCSVI.

14.07.2010

GOOD NEWS!

As of this week AMEDS Centrum provides the possibility for the patient's family to stay at the hospital. There are several guest rooms, simple, but quite nice and cozy. The number is limited however, so they will be provided on the first come first serve basis.

The prices are:

50 Euro for a 1-person room

75 Euro for a 2-persons room

Breakfast included

Please note that the guest rooms are located on the 6th floor of the hospital and the lift goes up only to the 5th floor, so there is one flight of stairs to climb, therefore they are not wheelchair accessible.

12.07.2010

VERY IMPORTANT INFORMATION

When booking your ticket please make sure to contact your travel agent and ensure that your tariff allows for affordable changes in case you will need to shift the date of departure. AMEDS Centrum will not be able to finance ticket changes in case of the necessity of longer hospital stay. Tickets change and the additional expenses due to longer hotel stay of the patient's family are the sole responsibility of the patient.

23.06.2010

Patients wishing to be placed on our last minute list (persons able to travel on short notice) please contact Agnieszka Szczap, our coordinator at a.szczap@ameds.pl. Please write LAST MINUTE in the subject field.

01.03.2010

At the present time we are in a final stage of the arrangement process and fulfilling formal requirements which are necessary to start diagnostics and CCSVI treatment procedures.

On the 28-th of February we have completed Phase I of arrangements and have entered Phase II which, as we had intended, has been completed on March 31st, 2010. Then we have entered Phase III, the last of the arrangement process which is to be completed until May 17th.

This will enable us to start CCSVI diagnostics and therapy. Parallel to legal and formal arrangements we work also on preparation of detailed procedures and requirements concerning CCSVI diagnostics and treatment, we provide training to our auxiliary personnel and continue efforts on organization and logistics of our centre.

Our medical team, technical personnel and auxiliary medical staff is being selected to provide our patients with a highest degree of comfort and highest efficiency of therapy.
